THERE IS, THERE ARE Tam je, tam so.

Ko v angleščini prvič govorimo o osebkem oziroma osebek še ni bil omenjen in bi ga radi poudarili, ga običajno postavimo za glagol, na prvo mesto pa postavimo **there is** ali **there are**.

THERE IS se uporablja, kadar sledi samostalnik v ednini, **THERE ARE** pa, kadar sledi samostalnik v množini.

V slovenščini rečemo: Na mizi imaš pismo in V moji pisarni so trije stoli. Če bi to dobesedno prevedli v angleščino, bi zvenelo takole: **On the desk you have a letter, in my office are three chairs**. Ta dva stavka zvenita res okorno, zato si pomagamo s frazo **THERE IS** oz. **THERE ARE**, kot lahko vidimo v primeru.

Primer

There is a letter for you on the desk.

There are three chairs in my office.

Vaja: OPIS HIŠE. dopolni s »tam je« oziroma »tam so«. Use **THERE IS** or **THERE ARE**.

Primer: There is a sofa in the living room.
